

## chemical anchors

# Vorpa Easyfit cartridge adaptor

Extrusion tool for silicone and chemical cartridges

## product information

## Characteristics of extrusion adaptor

- Easyfit is an innovative patented device that allows to convert any battery electric drill into a powerful extrusion tool for silicone and chemical anchoring cartridges, without the need to use an expensive dedicated and separate battery tool
- with Easyfit, the standard drill or work tool can be converted into a rapid extrusion tool and vice versa in seconds, so no worries about storing and loading separate battery packs. The use of the Easyfit adaptor allows to significantly reduce timing for repeated extrusions and extended length applications
- the Easyfit adaptors are lightweight and fit into any conventional battery drill, can be fold and are easy to store

## products group

Art 1341 EasyFit cartridge adaptor 280/300ml

Art 1342 EasyFit cartridge adaptor 380/420ml

## Benefits of extrusion adaptor

- easy to store not in use
- pressure control with speed-adjustable drills
- standard fittings to fit any cordless drill
- 12 months warranty
- limited and fluid extrusions
- separate battery-powered tools are not required
- save time and energy

## Product code

| Code | Description                      | Weight |
|------|----------------------------------|--------|
| 1341 | EASYFIT FOR CARTRIDGES 280/300ml | 0,72   |
| 1342 | EASYFIT FOR CARTRIDGES 380/420ml | 1,34   |

## installation sequence

1  
Insert the drill chuck into the hexagonal nozzle and tighten

2  
Tighten the drill base with the belt

3  
Insert the cartridge into the adaptor

4  
Adjust the tightening torque (10Nm)

5  
Set the speed of the drill to 1

6  
Extrude the product
